Although management believes that these assumptions are reasonable, they may prove to be incorrect.

By their nature, forward-looking statements involve numerous inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predicted outcomes may not occur or may be delayed. The risks and uncertainties that could cause the Company’s actual results to differ from the forward-looking statements, many of which are beyond the Company’s control, include, but are not limited to: the inability to close the Offering; the inability to obtain TSXV approval of the Offering; losses from operations; technology risks; litigation risk; the inability to meet regulatory requirements; delays or failures to obtain or maintain required permits or approvals; changing laws and regulations affecting the Company; the volatility of the price of the Common

Further, any forward-looking statement speaks only as of the date on which such statement is made, and, except as required by applicable law, the Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for management to predict all such factors and to assess in advance the impact of each such factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement. There can be no assurance that such information or statements will prove to be accurate, and accordingly, readers should not place undue reliance on forward-looking statements.

All of the forward-looking statements contained in this Offering Document are expressly qualified by the foregoing cautionary statements. Prospective investors should read this entire Offering Document and consult their own professional advisors to assess the income tax, legal, risk factors and other aspects of their investment.
